FREE Internet Security with Trend Micro PC-cillin 2010 software. Available to all High Speed Internet subscribers (a \$49.95/year value).

Unlimited Access

There are no hourly restrictions on your internet usage. With Home Telecom, you receive unlimited service for one flat fee.

Email Addresses

You get eight email addresses with your Business Internet account. Additional addresses are available for a monthly charge of only \$3.00 each.

Google Apps Partner

Includes Web-based e-mail, SPAM and virus filtering, Instant Messaging (IM), and more!

All business packages also include:

- Static IP address
- One free dial-up account for use while traveling
- 24/7 technical support
- Trend Micro PC-cillin 2010

Advantages of Fiber:

- Fiber is the only technology that will deliver enough bandwidth and reliability at a price that meets customer demands.
- Because fiber carries light, it is less susceptible to lightning strikes.
- Fiber can carry high bandwidth signals over long distances without degradation.
- While DSL and Cable Modems generally provide transmission speeds up to 50 Mbps on downloads, the upload speeds are much lower. Home Telecom's Internet over Fiber provides symmetrical speeds - meaning download and upload speeds are the same - up to 50Mbps up and down.
- Fiber is the future-proof choice. Constant improvements are being made to fiber equipment by increasing bandwidth without having to change the fiber or equipment at your business.

Requirements for Fiber:

- NIC or Ethernet Card Installed*
- Browser such as Internet Explorer, Firefox, or Chrome

*Home Telecom will install a NIC or Ethernet Card at the time of the modem installation if you wish. An additional fee applies.

Business Packages

Home Telecom offers a variety of products and services to help your business stay on the cutting-edge of new technologies. Your Home Telecom representative will be delighted to discuss these with you in detail.

Professional Services

Equipment

Home Telecom leases, sells, installs, and maintains state-of-the-art phone systems that can be customized to fit and type or size of business.
